

Most important speech recognition commands

Find the most common speech recognition commands in the following table.
To see the full list of all available commands, please refer to the Dragon website at www.nuance.com/dragon.

Note

- The entire list of speech recognition commands is only available if you are using real-time speech recognition by dictating into the recorder window of SpeechExec (online speech recognition).

If you use SpeechExec to have dictations, pre-recorded with a dictation device, transcribed by Dragon (offline speech recognition), only a restricted commands set (marked with * in the list below) can be used.

English UK

Dictation

New paragraph*
New line*
