PHILIPS

Dictation

Increase productivity

with premium voice recorders and dictation microphones

A global market leader you can trust

Over 60 years of innovation

Vienna-based company Philips Dictation develops speech-to-text technology to make life easier for busy professionals. The company has been making world-class, innovative products since the 1950s, starting with the mini cassette and voice recorder whose four-position slide switch enabled recordings to be made one-handed. Today, Philips Dictation develops and produces patented high-end microphones and hardware technology that help users save time and be more productive at work.

The dictation technology lets users concentrate on their core tasks, increase their billable hours, and improve their customer service. The innovative design and functionality of Philips voice recorders have garnered worldwide recognition for years and been honored with numerous prizes and awards, including the prestigious Red Dot Design Award.

SpeechMike Premium
Dictation Microphone

The SpeechMike Premium is one of the most widely used dictation microphones the world over. Featuring a decoupled, studio-quality premium microphone, an integrated filter to minimize ambient noise, a hygienic surface, and a movement sensor, it creates crystal-clear voice recordings for outstanding speech recognition results. The new touch sensor makes navigation even easier.

- Patented 100% lossless speech technology for seamless dictation and recordings without a cable*
- Studio-quality microphone for exceptional speech recognition results
- Decoupled, free-floating microphone for precise recordings without background noise
- High-quality touch sensor with integrated mouse function
- Hygienic surface
- Wireless version available*
- Docking station for high-speed charging and data transfer*

* SpeechMike Premium Air only

SpeechOne
Wireless Dictation Headset

The Philips SpeechOne Wireless Dictation Headset has been specially designed to meet the needs of users who frequently use dictation or speech recognition and want a hands-free device. The premium decoupled microphone creates crystal-clear recordings, perfect for accurate transcriptions. Its ultra-comfortable and ergonomic design, personalized wearing options, and hygienic exchangeable head and ear cushions make the headset the perfect work companion in both hospitals and offices alike.

- Studio-quality microphone for the best speech recognition results in its class
- Patented wireless transmission technology for 100% lossless audio transmission
- Long battery life for up to 12 hours of recording time
- Ergonomic design and custom wearing options
- Hygienic surface and exchangeable ear cushions
- Status light to reduce interruptions and boost productivity
- Docking station for high-speed charging and data transfer

PocketMemo
Voice Recorder

The PocketMemo Voice Recorder takes mobile working to a completely new level. The pioneering 3D Mic technology delivers premium audio quality in any recording situation. Its robust yet lightweight stainless steel design offers the perfect ergonomics for working over longer periods of time. Coupled with efficient dictation management software and a docking station for uploading your files, producing a text document from your voice recording has never been quicker or easier.

- 3D microphone for premium audio quality and accurate speech recognition results
- Built-in motion sensor for automatic microphone selection
- Ergonomic slide switch for efficient single-handed operation
- Light and motion sensors for extended battery life
- Optional barcode scanner for streamlined documentation
- Docking station for high-speed charging and data transfer

SmartMike Duo
AI Conversation Microphone

The Philips SmartMike Duo helps you document conversations easily and accurately, whether it's for legal compliance, quality assurance, or meeting minutes. You can keep your conversation with your colleague or client natural and comfortable and still receive clear transcripts of who said what. Created documentation can easily be retrieved later and jumping to the correct passage is quick and easy.

- Studio-quality microphone for clear recordings of conversations
- Smart AI microphone for clear separation of speakers
- Separate audio streams for precise transcriptions and outstanding speech recognition quality
- Real-time speaker separation allows you to record natural conversations
- Clear transcripts that distinguish between speakers
- Unique AI microphone algorithm for a natural conversation style

Transcription Set

The Transcription Set is a digital document creation solution specifically designed to make transcription easy and intuitive. The ergonomic foot control allows you to use all transcription and playback functions while keeping your hands free. The streamlined, ergonomic design means the set can be used with minimal physical strain. The lightweight, under-the-chin-style stereo headphones – designed to deliver excellent sound quality – have soft ear cushions for enhanced comfort.

- Quick and efficient playback control for quicker and more precise transcription thanks to the foot control
- Waterproof for safe and reliable use even in humid environments
- Lightweight, comfortable stereo headphones
- Seamless integration into Philips digital dictation solutions

In the office or on the go

Whether you want to dictate in the office or when you're out and about, Philips Dictation has the perfect device for you. The SpeechLive app, which works seamlessly with the Philips workflow software, is the ideal tool for users who want to dictate into their smartphone.

Setting standards worldwide

The SpeechMike is the best-selling dictation microphone from the Philips product range and has become the standard in hospitals. The new wireless Philips SpeechOne Headset enables users to dictate hands-free, making their work even easier and more efficient.

Seamless compatibility

All voice recorders work perfectly with the Philips dictation and transcription software, which speeds up document creation. The range of software from Philips Dictation includes SpeechLive, SpeechExec Pro, and SpeechExec Enterprise. These solutions help businesses work more efficiently, become more profitable and successful, plus improve communication and teamwork among personnel.
